# Tilapia

**Foods From The Sea "Izumidai" Tilapia Fillet** comes straight from the rich fishing waters of China and Taiwan. This product is farm raised and available year round. Each fillet is individually vacuum packed in a full color bag and can be weighed and sold at retail. Because the product retains a fresh-like appearance once thawed it can be removed from the bag and sold from the fresh seafood case as well.

**Foods From The Sea "Izumidai" Tilapia Fillet** is 100% net weight. While CO (carbon monoxide) is used to retain the natural color of the fillet no chemicals are used for weight retention. This product is size graded 3-5, 5-7, 7-9, or 9-11 oz per fillet, packed 10 lbs per case.

**Foods From The Sea Tilapia** is also available as whole gutted and scaled fish. These fish are individually bagged and are primarily sold frozen. This product is size graded 350-550 as well as 550-750 grams per fish, packed 40 lbs per case.

**Foods From The Sea Tilapia's** versatility in preparation offers a wide variety of options for everyone to enjoy. Consistency in pricing and year-round availability makes Tilapia a great addition to your menu.
